

# ECUADOR - ABSOLUTE GALAPAGOS CRUISE | GRAND DAPHNE

## INTRODUCTION

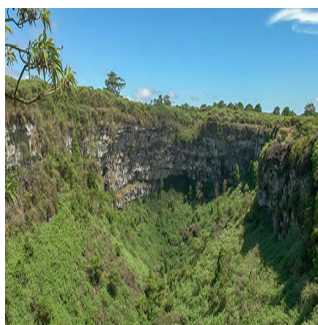

This comprehensive 17-day tour of the stunning **Galapagos Islands** sees you sailing as far afield as **Espanola**, the spectacular southernmost island of the Galapagos, past Kicker Rock to the westernmost island of Fernandina and up to the north-eastern outpost of **Genovesa**. Spectacular scenery and an incredible array of flora and fauna, both land and marine, are all waiting to be discovered as you cruise between the islands aboard the Grand Daphne. Blue and red-footed boobies, frigatebirds, vermillion flycatchers and Darwin's finches are amongst the colourful birds you are likely to spot. Be intrigued by the prehistoric-looking iguanas and lava lizards, the playful sea lions, the placid giant tortoises and the soaring albatrosses. Be mesmerised by the beautiful landscapes from mangrove wetlands to lava fields, Scalesia cloud forests, red sand beaches and picturesque coves. This will be an incredible experience that will be etched in your memory forever.

Check out some of the other itinearies on the Grand Daphne: [10 Day Ultimate Galapagos](#), [10 Day Complete Galapagos](#), [6 Day Galapagos at a Glance](#), [7 Day Galapagos Adventure: Northern Islands](#)

**ECUADOR - ABSOLUTE GALAPAGOS CRUISE | GRAND DAPHNE**

### DAY 3: Isla Floreana

Discover the quirky maritime history of Post Office Bay, home of the oldest postal system in the Americas. Take the opportunity to post a letter in the historic post office barrel from 1793 which is still used today. Galapagos visitors can leave letters and postcards to be collected by the next passing boat. Snorkelling and a lovely panga ride are also included in this outing. Afterwards, head ashore at Punta Cormorant where the sand is made up of fine olivine crystal (a glassy volcanic mineral that gives the beach an olive-green colour). This is the best place to see Galapagos sea lions. Keep an eye out for pink flamingos and other waterbirds wading in the lagoons, including pintails and stilts. The moderate 2-kilometre walk continues to a white-flour sandy beach, which is an Eastern Pacific green turtle nesting site. Young diamond stingrays are commonly found in the shore line. Enjoy the view of the turquoise crystalline ocean. Just offshore, the famous Devil's Crown is an old eroded volcanic cone and a popular roosting site for seabirds such as boobies, pelicans and frigates. Red-billed tropicbirds can also be seen nesting in the rocky crevices. The centre of the cone is an outstanding spot and many people find this one of the best snorkelling experiences of their trip. You might see rays, sharks, sea lions and turtles.

### DAY 4: Isla Española

Sail overnight and wake up on the island of Española, the spectacular southernmost island of the Galapagos. Because of its remote location, this island has a large population of endemic fauna. It is the breeding site for nearly all of the world's 12,000 pairs of waved albatrosses and also home to colonies of blue-footed and masked boobies. Trails from the golden beaches, where sea lions bathe and marine iguanas make their way towards the water, lead you right through the middle of booby colonies, and Galapagos doves and mockingbirds are also often seen. Land at Punta Suarez, one of the most attractive locations in the Galapagos, home to a large and varied wildlife population. A walk along its rocky trails (approximately 3 km) takes you to a clifftop viewpoint that affords magical panoramas. Boobies line the rocky shoreline below, while frigate birds can be seen overhead. Enormous male sea lions lounge nearby, and albatross use the cliffs as their 'runway', getting airborne on the southeast winds. If you're lucky you might spot the elaborate courtship rituals performed by albatrosses before the female chooses her lifelong mate. Next, head to Gardner Bay, one of the most beautiful beaches of the Galapagos Islands. It's full of sea lions and hooded mockingbirds. Enjoy a walk (approximately 1 km) along the beach, and do some snorkelling which could be great for playing with sea lion pups and many fish. The rocks off the coast provide particularly great snorkelling, with reef sharks, turtles and many species of tropical fish (such as surgeon and angelfish). Small white-tipped reef sharks are also often spotted resting under the rocks.

### DAY 5: Isla San Cristobal

Shake off any early morning dozing with a trip to Leon Dormido (Kicker Rock). This basalt crater rises 150 metres above the water and is divided into two parts by a narrow channel. Cruise around kicker rock as nesting seabirds flank the boat, tropicbirds soar overhead and sea lions lounge by the water. Next, spend some time snorkelling at Cerro Brujo, providing opportunities to see Galapagos sharks and sea turtles. Or perhaps enjoy the beautiful beach with a leisurely walk to photograph the interesting sea lions who can often be seen at this location. Later, sail to Puerto Baquerizo Moreno on the island of San Cristobal. Some passengers will be leaving and others joining the group today, so you have some free time to explore the town of San Cristobal. In the afternoon you will visit the San Cristobal Interpretation Centre, which brings the history and geography of the archipelago to life, from its volcanic origins to the present day. If there's time, your guide may be able to organise an optional visit to the highlands of San Cristobal, for a chance to see giant tortoises in the wild. The price of this optional activity depends on the number of passengers attending. Relaxing on the beach is a great option for those who don't wish to partake in this excursion.

### DAY 7: Isla Genovesa

After an overnight sail, reach Isla Genovesa, the archipelago's north-eastern outpost. It's undeniably worth the voyage. Dolphins are often spotted in the waters around beautiful Genovesa. These varied landscapes are a twitcher's paradise, with all three kinds of boobies, including the rare red-footed booby, and numerous other species such as tropicbirds and frigate birds. Next, Bahia Darwin (Darwin Beach) is another superb site with large breeding colonies of seabirds and frigates and other birds such as lava herons, swallow-tailed gulls, mockingbirds and, hopefully, vampire finches. Enjoy a moderate walk (approximately 2.5 hours) that passes tide pools, sea lions and diamond stingrays. This walk involves sand and some rocky sections. The steep Prince Philip's Steps lead you to the heart of the seabird rookeries, with birds overhead and nesting among the cliffs. Look out for storm petrels on the island's rocky plains; Genovesa is the only place in the world where these birds can be seen flying during the day. Afterwards, perhaps cool off with a snorkel. The island's magnificent marine life makes for spectacular snorkelling - you might encounter manta rays, sharks, turtles and moray eels, plus many species of fish. Later tonight, depart Isla Genovesa for Isla Santiago.

### DAY 12: Isla Fernandina - Isla Isabela

Today we visit Punta Espinosa that is a narrow ledge of lava and sand extending from the base of La Cumbre volcano. Take a walk around the beautiful peninsula, which boasts such wildlife and plant life as lava cacti, marine iguanas, barking sea lions, tiny penguins and Sally Lightfoot crabs. Keep a lookout for that marvelous Galapagos predator hunting from the treetops: the Galapagos hawk. Top-notch snorkeling opportunities await in the clear waters, and turtles and sea lions can be seen swimming around and feeding on the shore. This is also a great spot to see flightless cormorants drying their atrophied wings on the rocks. In the afternoon head to Punta Vicente Roca, this site allowed for panga rides to observe the abundant wildlife and offers one of the best snorkeling spots of the Archipelago. The snorkeling "route" takes us along the cliffs and offers the not so common chance of exploring two shallow underwater caves. The primitive and unaggressive bullhead shark, known locally as the Port Jackson shark, is often seen here sharing its space with red-lipped batfish, frogfishes, Pacific seahorses, the endemic Camotillo, schools of barracuda and brown-striped snappers. Sponges, corals, and other marine invertebrates are also abundant in the area.

### DAY 13: Isla Santiago

Sail this morning to Puerto Egas, a black-sand beach on the west side of James Bay, northwest of Isla Santiago, home to incredible volcanic tuff formations. Take a stroll along the beach with the native marine iguanas, pelicans, finches, mockingbirds, oystercatchers, Galapagos sea lions and Galapagos fur seals. You can see the amazing tidal pools, formed from ancient lava flow, providing a home for sponges, snails, hermit crabs, barnacles and fish. You might also end up snorkelling with a Galapagos fur seal - they're always looking for a friend! In the afternoon travel to the northwest side of Santiago Island where you'll find Caleta Bucanero, named after the pirates and buccaneers who once found shelter in the bay. Here you'll have the chance to go snorkelling and take a dinghy ride to look for blue-footed boobies, pelicans and nocturnal seagulls nesting in the cliffs.

## DAY 14: Isla Bartolome - Isla Sombrero Chino

Wake up in Bartolome Island, a spectacular volcanic landscape full of spatter cones and lava flows, and home to Galapagos penguins and lava lizards. Put on your walking shoes and climb up 360 wooden steps to the summit, where an amazing view of Pinnacle Rock awaits. This is one of the most photographed sights in the Galapagos – an abrupt jag of rock protruding from the earth like a tooth, providing a focal point for two nearby bays. Hike to the top of a once-active volcano and enjoy superb views across to Bahia Sullivan on nearby Isla Santiago. If you're in luck, you might catch a glimpse of the Galapagos hawk. There's also the chance to go snorkelling among the colourful marine life. In the afternoon, travel to the small island of Sombrero Chino, found on the southeast side of Santiago Island. With lovely sandy beaches and a striking volcanic landscape, this is a fantastic place to take a hike and look out for the sea lions and penguins that rest here, and snorkel in search of reef sharks and sea turtles.

## DAY 15: Isla North Seymour - Isla Santa Cruz

Wake up this morning in North Seymour, one of the most visited islands of the Galapagos. First up is a walk around the island to spot some blue-footed boobies and swallow-tailed gulls. Boobies and frigates have an interesting relationship, sharing the same nesting area on North Seymour. Blue-footed boobies nest on the ground while the frigate birds nest just above them in the saltbushes. As you walk, look out for land iguanas, marine iguanas, Galapagos sea lions and the endemic incense tree. After the walk, cool off and go snorkelling and encounter a great variety of fish and perhaps some white-tipped reef sharks, rays and sea lions. Later in the day, travel to Isla Santa Cruz, the second largest island in the Galapagos. Pay a visit to the Charles Darwin Research Station in the small town of Puerto Ayora. As well as undertaking vital conservation work, the station also makes for interesting exploration and offers the best opportunities for close encounters with giant tortoises. You may also see baby tortoises and land iguanas.

## DAY 16: Baltra - Quito

Flights to the mainland from Galapagos depart mid-morning, so it's an early start for your last morning on the islands. You will visit the Santa Cruz Highlands for a second time. Travel through the agricultural region and into the misty forests where you can see the unique *Scalesia* cloud forest and experience seeing the dome-shaped giant tortoises in the wild once again. Take in the serene atmosphere of the highlands and its wildlife and then it's time to bid farewell to the archipelago and head to the airport for your mid-morning flight back to Quito for the last night of the tour. This flight takes approximately 2.5 hours with a transit in Guayaquil. Upon arrival at Quito Airport, at about 4pm, you'll be transferred back to your hotel for an overnight stay. A local Intrepid representative might stop by the hotel this evening to get your feedback on the trip.

## DAY 17: Quito

There are no activities planned for the final day so we are able to depart our accommodation at any time. If you have not spent time here before, we recommend you stay on a few days as there are many fascinating things to do in and around Quito, such as the Cotopaxi volcano, the Cloud Forest, hot springs, the Equatorial Monument or perhaps city tour of the fascinating Old Town. Please speak to our customer service representative about any optional activities that might be of interest. They can also assist you in booking a departure transfer to the airport.
